No. 1

HEADQUARTERS  
DEPARTMENT OF THE ARMY  
WASHINGTON, D.C., 13 September 1973

**Organizational Maintenance Repair Parts and  
Special Tools Lists  
for  
TRACTOR, FULL TRACKED, LOW SPEED: DIESEL  
ENGINE, MEDIUM DRAWBAR PULL, OSCILLATING  
TRACK; 74-IN. MINIMUM GAGE; POWER SHIFT  
TRANSMISSION; W/BULLDOZER, HYDRAULIC TITLING  
W/BACKRIP, SCARIFIER; W/WINCH, REVERSIBLE  
REAR, 1 DRUM (ALLIS-CHALMERS MODEL HD16M)  
FSN 2410-078-6483, W/RIPPER, HYDRAULIC  
(ALLIS-CHALMERS MODEL HD16M) FSN 2410-078-6484**

Current as of 31 May 1973

TM 5-2410-209-20P, 21 April 1972, is changed as follows:

*General.* All changes, additions, or deletions of Federal Stock Numbers (FSN's) or Manufacturer's Part Numbers (P/N's) within this change must be appropriately reflected in the index.

*Page iii.* In Section IV, delete "(NOT APPLICABLE)".

*Page v, paragraph 2b.* In line 5, delete "(Not applicable)".

*Page vii.* Paragraph 7 is superseded as follows:

### 7. Reporting of Equipment Publication Improvements

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commander,

U.S. Army Troop Support Command, ATTN: AM STS-MP, 4300 Goodfellow Boulevard, St. Louis, MO. 63120.

*Page 36, Group 15.* In line item 5, change column (1) to "PO"; to column (2), add: "5340-282-7519"; to column 6 (a), (b), (c), and (d), add: "2", "2", "4", "7", respectively.

*Page 55.* In line item 19, change part number in column (3) to "0650578-8".

*Page 58, Group 26.* In line item 3, add to column (2); "2940-740-6099". In column (3), change part number to read: "4388-648-0". After line item 3, add line item 3A as follows: in column (1), add: "X20"; in column (3), add: "NIPPLE PIPE 0901467-1"; column (4), add: "EA"; in column (5), add: "1". After line item 3A add line item 3B as follows: in column (1); add: "X20; in column (3), add: "FLANGE 3045531-5"; in column (4), add: "EA"; in column (5), add: "1".

*Page 223.* After page, add Section IV as follows:

## SECTION I INTRODUCTION

### 1. Scope

a. This manual lists repair parts, special tools, test and support equipment required for the performance of organizational maintenance of the Tractor.

b. Repair parts listed represent those authorized for use at the organizational level and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 735-35 or AR 710-2.

### 2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. *Repair Parts - Section III.* A list, in figure and item number sequence, of repair parts authorized at the organizational level for the performance of maintenance, including those items which must be removed for replacement of the authorized item. Items, except kits and sets, are listed by assembly group in top down breakdown sequence. Repair parts kits and sets are listed at the end of the Repair Parts Listing assembly or group to which they apply. Components of the kits and sets are listed in their proper sequence in the assembly or group to which they belong and are referenced to the FSN of the kit or set.

b. *Special Tools, Test and Support Equipment - Section IV.* A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational level. (Not applicable.)

c. *Federal Stock Number and Reference Number Index - Section V.* A list of Federal stock numbers in ascending numerical sequence followed by a list of reference numbers in alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

### 3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in sections II and III.

a. *Source, Maintenance, and Recoverability Codes (SMR):*

(1) Source code indicates the source for the listed item. Source codes are:

| Code | Explanation  |
|------|--|
| P    | Repair Parts, Special Tools and Test Equipment supplied from the GSA/DSA, or Army supply system, and authorized for use at indicated maintenance levels.   |
| P2   | Repair Parts, Special Tools and Test Equipment which are procured and stocked for insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.   |
| M    | Repair Parts, Special Tools and Test Equipment which are not procured or stocked, as such, in the supply system but are to be manufactured at indicated maintenance levels.  |
| A    | Assemblies which are not procured or stocked as such; but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance levels.  |
| X    | Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.  |
| X1   | Repair Parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.  |
| X2   | Repair Parts, Special Tools and Test Equipment which are not stocked and have no foreseen mortality. The indicated maintenance level requiring such repair parts will attempt to obtain the parts through cannibalization or salvage, if not obtainable through cannibalization or salvage, the item may be requisitioned with exception data, from the end item manager, for immediate use. |
| G    | Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above the DS and GS level or returned to depot supply level.   |

#### NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded X1 and aircraft support items as restricted by AR 700-42.

(2) Maintenance code indicates the lowest level of maintenance authorized to install the listed item. Repair Parts and Special Tools assigned maintenance code "C" may be stocked at the operator level of maintenance when authorized by the Unit

Commander. The maintenance level codes are:

| Code      | Explanation                  |
|-----------|------------------------------|
| C . . . . | Crew or Operator maintenance |
| O . . . . | Organizational maintenance   |

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

| Code | Explanation   |
|------|---|
| R    | Applied to repair parts, (assemblies and components), special tools and test equipment which are considered economically reparable at direct and general support maintenance levels. When the item is no longer economically reparable, it is normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis. |
| S    | Repair Parts, Special Tools, Test Equipment and assemblies which are economically reparable at DSU and GSU activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically reparable, they will be evacuated to a depot for evaluation and analysis before final disposition.   |
| T    | Higher dollar value recoverable repair parts, special tools and test equipment which are subject to special handling and are issued on an exchange basis. Such items will be evacuated to the depot for overhaul or final disposition. Communications-Electronics and missile support items will be repaired/overhauled only at depots.   |
| U    | Repair Parts, Special Tools and Test Equipment specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value or reusable casings or castings.   |

b. *Federal Stock Number.* This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

c. *Description.* This column indicates the Federal item name and a minimum characteristics description required to describe the item. Assembly components and subassemblies are indented under major assemblies. The abbreviation "w/e", when used as a part of the nomenclature, indicates the Federal stock number includes all armament, equipment, accessories, and repair parts issued with the item. A part

number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parenthesis. Repair parts quantities included in kits and sets are shown in front of the repair part name. Material required for manufacture or fabrication is identified.

d. *Unit of Measure (U/M).* A two character alphabetic abbreviation indicating the amount or quantity of the item, as used, upon which the allowances are based, e.g., ft., ea., pr., etc.

e. *Quantity Incorporated in Unit.* This column indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated, e.g., shims, spacers, etc.

f. *Fifteen-Day Organizational Maintenance.*

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The allowance columns are divided into four subcolumns. Indicated in each subcolumn is the total quantity of special tools authorized for the number of equipments supported. (Not applicable.)

g. *Illustration.* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item on the illustration.

#### 4. Special Information

a. Identifications of the useable on codes included in the description column of this publication are: (Applicable only when identifying parts to a particular serial number range or model).

| Code      | Used on             |
|-----------|---------------------|
| A . . . . | Engine Model 16,000 |
| B . . . . | Engine Model 17,000 |

b. Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column the higher level.

c. The following publications pertain to the Tractor and its components:

- TM 5-2410-209-12 Organizational maintenance Manual
- TM 5-2410-209-35 DS, GS and Depot Maintenance Manual
- TM 5-2410-209-34P DS, GS, and Depot Maintenance Repair parts and special tools lists

LO 5-2410-209-12 Lubrication order

d. The illustrations in this manual are identical to the applicable illustrations published in the -34P, Direct and General Support and Depot Maintenance Repair Parts and Special Tools List manual, and the figure numbers are the same as appear in that manual. The -34P illustrations are given for a better understanding of the parts relationship, however, only those parts assigned maintenance code "O" are listed in the tabular list. Only illustrations containing organizational authorized items appear in this manual.

## 5. How to Locate Repair Parts

a. *When Federal Stock Number, Reference Number or Part Number is Unknown:*

(1) Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups and listings are divided into the same groups.

(2) Find the illustration covering the assembly group to which the repair part belongs.

(3) Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) Using the Repair Parts Listing, find the assembly to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. *When the Federal Stock Number, Reference Number, or Part Number is Known:*

(1) Using the Index of Federal Stock Numbers, Reference Numbers, and/or Part Numbers find the pertinent Federal Stock Number, reference number, and/or part number. This index is in ascending FSN sequence followed by a list of reference numbers or part numbers in alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) Using the Repair Parts Listing, find the assembly group of the repair part and the illustration figure number and item number referenced in the index of Federal Stock Numbers, Reference Numbers, or Part Numbers.

c. *When the Federal Stock Number, Reference Number, or Part Number is known and the Repair Part is not Illustrated:*

(1) Using the Index of Federal Stock Numbers, Reference Numbers, and/or Part Numbers find the pertinent Federal stock number, reference number, or part number. Parts which are not illustrated will reference to a figure number but will not show an item number. This section of the index is in ascending FSN sequence followed by a list of reference numbers or part numbers in alpha-numeric sequence, cross-referenced to the figures.

(2) Using the Table of Contents, locate the figure number and page number.

(3) Using the applicable figure and page number, locate the pertinent stock number, reference number, or part number in the Repair Parts Listing.

## 6. Abbreviations

|               |                    |
